

BHARATH V

Aspiring AI & ML Engineer | Full-Stack Developer

+91 7010718225 | vbharathvsb@gmail.com | [GitHub](#) | [LinkedIn](#) | Karur, Tamil Nadu, India

CAREER OBJECTIVE

Final-year AI & ML undergraduate with hands-on experience building full-stack web applications and AI/ML solutions using Python, Java, and modern web technologies. Seeking a software engineering or AI/ML role to apply my skills and contribute to impactful projects.

EDUCATION

Bachelor of Engineering — Computer Science and Engineering (AI & ML)	2023-2027
---	------------------

V.S.B. Engineering College, Karur. **CGPA: 8.25 / 10.0**

Higher Secondary Certificate	2022-2023
-------------------------------------	------------------

Govt.Hr.Sec.School, Mamandur. **Percentage: 79.3%**

TECHNICAL SKILLS

Languages: Java, Python

Frontend: HTML | **Backend & Databases:** SQL

AI / ML: YOLO (object detection), Genetic Algorithm optimization, OpenCV, CNN

Tools & Platforms: Git, GitHub, VS Code, PyCharm, Eclipse, Google Colab, Supabase, Canva, Adobe Express, Microsoft Office

PROJECTS

Online Medication & Prescription Tracker [\[GitHub\]](#)

Tech Stack: HTML, CSS, JavaScript, Python, SQLite

- Developed a web app that digitizes prescription records with a role-based system for doctors to issue e-prescriptions and patients to track dosage and refill reminders.

Debugging Contest Platform [\[GitHub\]](#)

Tech Stack: HTML, CSS, JavaScript, Python

- Created an interactive coding challenge platform with a leaderboard system to rank participants by accuracy and time, enhancing competitive engagement.

FixIt – Campus Management System [\[GitHub\]](#)

Tech Stack: React.js, ASP.NET Core, PostgreSQL, JWT, REST APIs

- Developed a role-based campus issue management system for reporting, assigning, tracking, and resolving maintenance issues through dedicated dashboards for students, staff, and administrators.

INTERNSHIPS

Technology Stack Intern — Infosys

Nov 2025 - Jan 2026

- Developed an Online Medication & Prescription Tracker as the core project deliverable, gaining practical exposure to full-stack development workflows and iterative software delivery.

ML Intern — Plasmid Innovation

Oct 2024 - Dec 2024

- Built an Email Spam Detection system using supervised ML, pre-processing email datasets (tokenization, TF-IDF) and training classification models for reliable detection accuracy.

CERTIFICATIONS

-
- | | |
|--|-------------------------------|
| • Programming in Java | — NPTEL & Infosys SpringBoard |
| • Excel Basics for Data Analysis | — Coursera / IBM |
| • Generative AI Fluency | — NASSCOM |
| • Salesforce Become an Agentforce | — NASSCOM / Salesforce |

ACHIEVEMENTS

-
- Black Belt in Karate (discipline & leadership) and Typewriting Certification (45 WPM).
 - Designed event visual content using Canva/Adobe Express; solve algorithmic problems on LeetCode.
